REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The invention of the instant claims recites a method of preparing homogeneous particles by freeze spraying technique where there is a minimum of 15% dry content in the liquid medium. The dry content, coupled with the binding agent and proportions of polymers provides improved microparticles over the prior art. The particles produced by the method of the instant claims are stronger i.e., porous microparticles having low friability. The particles have properties that would be successfully coated by a fluidized bed coating process. The method of the instant claims show the relationship between the minimum dry content and the polymer-binding agents, and show the importance of such a ratio. Particles with dry content less than 15% and/or polymer binder content less than 5% are too fragile and do not possess the mechanical properties needed for successful coating. Ratwatt discloses a similar method yet does not disclose the dry content/binder relationship.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
